

## 7.0 INDEX

- Asset management 1-5, 1-8, 1-10
- Bridge inspection 3-160
  - Abutments and piers 3-161
  - Approaches 3-163
  - As performed by supervisors 3-163
  - Beams and stringers 3-161
  - Bearings 3-161
  - Concrete test not related to corrosion 3-168
  - Decks 3-162
  - Fatigue and fracture conditions 3-165
  - Inspection process 3-160
  - Load tests 3-170
  - NBI program 3-160
  - Redundancy 3-164
  - Reinforced concrete corrosion survey tests 3-167
  - Reports 3-163
  - Resource estimating 3-164
  - Testing steel members 3-169
  - Timber member tests 3-170
  - Trusses 3-162
  - Waterway or steam channel 3-160
  - Wearing surfaces 3-163
- Bridge maintenance (general) 3-1
  - Load rating 3-1
  - Maintenance concepts 3-11
  - References 3-138
  - Structural systems 3-3
    - Arch bridges 3-5
    - Beam bridges 3-3
    - Cable-supported bridges 3-6
    - Materials 3-9
    - Truss bridges 3-7
- Bridge maintenance management 3-142
  - Contract maintenance 3-153
    - Contract vs. in-house maintenance 3-157
    - Cost reimbursement 3-155
    - Lump sum 3-154
    - Negotiated 3-156
    - Unit price 3-155
- General 3-142
  - Network-level vs. project-level decisions 3-145
  - PONTIS 3-144
  - Process 3-142
  - System interfaces 3-146
  - System requirements 3-144
- Performing work 3-150
  - Equipment 3-151
  - Job execution 3-150
  - Materials 3-151
  - Personnel resources 3-150
- Planning and scheduling 3-146
  - Graphical scheduling methods 3-149
  - Job layout 3-147
  - Long-range plans 3-146
  - Short-term scheduling 3-149
  - Work orders 3-147
- References 3-176
- Reporting accomplishments 3-152
  - Procedures 3-153
  - Requirements 3-152
  - Why report? 3-152
- Bridge maintenance quality control and quality assurance 3-152
  - Budget monitoring 3-159
  - Methods of quality assurance 3-159
  - Quality control at work site 3-157
  - Rigging and climbing site review 3-158
  - Schedule monitoring 3-159
  - Technical site review 3-158
  - Tools and equipment use site review 3-158
  - Traffic control site review 3-158
- Bridge structural decks 3-18
  - Concrete decks 3-18
    - Asphaltic concrete patching 3-22
    - Crack sealing 3-22
    - Emergency full-depth patching 3-22
    - Polymer patching 3-21
    - Overlays 3-23
    - Patching 3-20
    - Preventive maintenance 3-18
    - Replacement 3-24
    - Sealing 3-19

- Curbs 3-35
    - Asphalt 3-36
    - Concrete 3-36
    - Metal 3-35
    - Stone 3-36
    - Timber 3-36
  - Deck drainage systems 3-34
    - Gratings 3-35
    - Open joints with troughs 3-35
    - Scuppers 3-34
  - General 3-18
  - Maintaining bridge deck joints 3-26
    - Joint classifications 3-27, 3-29
      - Closed joints 3-30
        - Compression seal 3-31
        - Cushion seal 3-32
        - Filled butt joint 3-30
        - Membrane seal 3-31
        - Modular dam joint 3-32
      - Open joints 3-29
        - Butt joint 3-29
        - Finger joint 3-30
        - Plate joint 3-29
    - Joint functions 3-29
    - Joint types 3-27
    - Preventive maintenance 3-33
  - Railings 3-37
    - Aluminum 3-38
    - Concrete 3-37
    - Steel 3-37
  - Sidewalks 3-36
  - Steel grid decks 3-26
  - Timber decks 3-25
- Bridge substructure 3-60
    - Bent and pile repair 3-72
      - End bent repair 3-78
        - Pile splice 3-78
      - Installing deadman anchorage 3-81
      - Installing helper bent 3-78
      - Intermediate bent repair 3-76
        - Adding a section of timber pile 3-77
        - Splicing timber piles, steel columns 3-77
        - Steel pile bents 3-76
    - Jackets for protection and repair 3-72
    - Pile repair 3-74
      - Casting subfooting to cap piles 3-76
      - Patching concrete piles 3-76
      - Pile shell repair 3-76
      - Splicing steel H-piles under footings 3-76
      - Steel pile 3-74
    - Pile replacement 3-74
    - Preventive maintenance 3-72
  - Timber cap repair 3-80
    - Cap rotating 3-80
    - Timber cap replacement 3-81
    - Timber cap strengthening 3-81
  - Maintenance (general) 3-61
  - Preventive maintenance 3-61
  - Repair process (general) 3-62
  - Repair substructure above water line 3-63
    - Abutment face 3-64
    - Crack in substructure 3-65
    - Deterioration at water line 3-66
    - Spread footing 3-65
    - Surface deterioration 3-66
